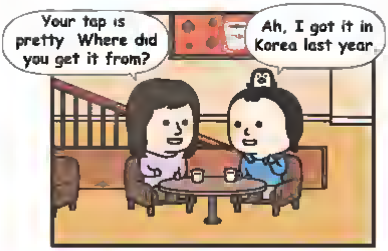
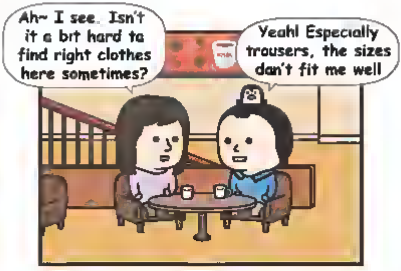
Fashion Style: Part1

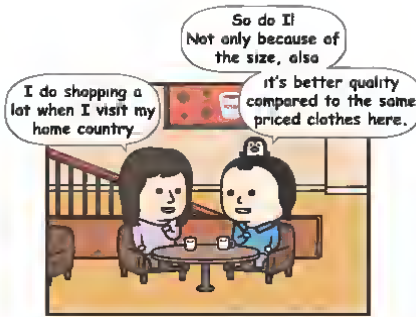
Obviously,
there are some fashion differences
between Korea and Englond I think.



Personally, I like the design of Korean clothes.



Also they fit better on me.



So do I!
Not only because of the size, also
I do shopping a lot when I visit my home country
it's better quality compared to the same priced clothes here.

Therefore I prefer Korean clothes to English clothes

However, there is one thing that UK's fashion has had a positive effect on me.

That is boldness.

So, far example,
I'm not afraid of wearing something like a crop tap which I never could imagine ta wear in Korea,..

... and I'm not too shy to wear something to stand out.

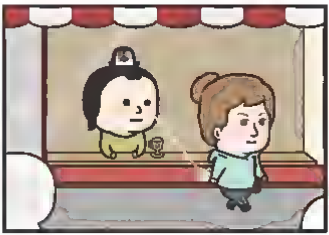
The reasons I can be like this is....

... First, here there are many people who just wear what they want to wear without worrying too much.

Secondly, people don't seem to care about what other people wear.

So, I think,
this freedom is the coolest thing
in English fashion.

However, still, there is a thing
that I can't be cool about.



That is English girl's leggings fashion!

Like Korea, I see many people who wear a long top when they wear a pair of leggings, but also I see many who don't.

So this leggings fashion without a long top....

became a challenge.

To be continued
